## SUMMARY

---

Full-stack Software Engineer with 2+ years of experience building production-grade web applications and scalable systems. Specializes in React, Next.js, and Node.js with hands-on ownership of architecture decisions, cloud infrastructure on AWS, and headless commerce platforms. Proven track record of delivering measurable business impact across high-velocity product teams.

## EXPERIENCE

---

**Software Development Engineer 1**, Tectonic, Bengaluru July 2025 – Present

- Developing scalable storefronts for D2D with high traffic throughput using AI-native architecture
- Built and deployed AI agents to automate storefront development, optimize tasks, and maintain blazing-fast performance
- Leveraged React, Remix, TypeScript to deliver high-performance, user-centric web experiences with near-instant load times and exceptional responsiveness.

**Devx Commerce** — Software Development Engineer April 2024 – July 2025

- Engineered a responsive **multi-store POS system** (React, Redux, TailwindCSS v4) backed by **MedusaJS** and Shopify, processing **800+ orders and \$37K+ in sales** within the first month of launch.
- Implemented **role-based authentication** and end-to-end management modules for orders, inventory, employees, and CMS, enabling seamless operations across multiple store locations.
- Built a high-performance **headless Shopify storefront** using **Next.js 15**, achieving Lighthouse scores of **95 (desktop) / 75 (mobile)** through SSR, image optimization, and lazy loading.
- Architected and published a **reusable NPM SDK** (Turborepo monorepo) encapsulating Shopify Hooks and API abstractions for cart, orders, and collections, cutting code duplication by **25%** and storefront development cycles by **15%**. [SDK](#), [Hooks](#)

**SDE Intern**, Firecamp, Surat January – March 2024

- Integrated a user and workspace settings module with features for managing workspace members, subscription plans, and AI provider integrations (OpenAI, Anthropic, Gemini)
- Designed a user invitation system to streamline onboarding and collaboration within shared workspaces
- Created a chat folder and collection feature to enable users to organize, manage, and share AI-generated conversations

## Open Source

---

**monday.com/vibe** – monday.com’s official React component library (600+ stars) October 2023

- Delivered **19 PRs** across **Vibe** and **Vibe Storybook Components** – shipping accessibility features, bug fixes, TypeScript migrations, and CSS modules migrations. [PRs](#)
- Added **accessibility props** (ariaLabel) to AvatarGroupCounter, TableHeaderCell, Chips, and AttentionBox components, improving WCAG compliance across the design system

**Trigger.dev (YC-W23)** October 2023

- Built the **Events Section** for viewing webhook and HTTP endpoint events with run tracing – featured in the **v2.2.28 release**. [Link](#)
- Shipped dashboard features including **run filtering by timeframe**, **invite revocation**, and **bulk run cancellation** from the SDK. [PR](#)
- Authored **12 PRs** showcasing third-party API integrations (YouTube, Google Maps, Drive, Docs, Anthropic). [Link](#)

## SKILLS AND EXPERTISE

---

**Languages:** JavaScript, TypeScript, Python

**Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Redux, TailwindCSS, MedusaJS

**Databases:** PostgreSQL

**Cloud & AWS:** S3, CloudFront, Lambda, SQS, OpenSearch
